

FOR IMMEDIATE RELEASE:

New order: BoMill forecasts a growth by 300% in 2017

The Swedish company BoMill AB has during the summer received a new major order of their grain sorting technique, TriQ. The order means that BoMill now have sold 35 units of its single kernel sorting equipment in Europe and North America.

BoMill's unique Single Kernel Sorting technology can be used to sort Durum wheat, Soft wheat, Malting barley, Spelt and Oat on Fusarium (DON), Protein, Vitreousness, Seed quality and Falling number with a speed of 25,000 kernels per second. This makes the TriQ very profitable for businesses within seed cleaning, grain handling, feed and milling.

Karin Wehlin, CEO at BoMill, says "The market for Single Sorting by the internal properties of each individual kernel in a batch of grain is growing all the time. The latest order is a proof that our technology has become a strategic decision in our customers' way of developing their businesses." It's all about how to Capture the hidden value in your grain."

There is also an increased interest in BoMill's technology in China. BoMill has been invited to attend the 19th Jiangsu International AgriExpo in China in September 22-24. Several companies within the grain industry have shown interest in the technology.

To meet the increased market demand, BoMill has during the summer moved into new premises located in Malmö close to Copenhagen airport.
